PROFESSIONAL OBJECTIVE

Fast learner and passionate worker. Also a team player with an eye for detail. Eager to secure an entry-level position, where I can use as well as improve my skills and leverage my learnings.

PROJECTS

Ocular Disease Recognition using Deep Learning

The proposed solution combines **transfer learning** with **CNN** (a pre-trained model namely **EfficientNet**) to deliver **92% accuracy** in ocular disease (like cataracts, myopia, diabetic retinopathy, AMD, Diabetes) classification from fundus images (uses **ODIR-2019 dataset**), revolutionizing ophthalmology diagnostics.

Email Authentication

Developed a **mini full-stack web application** for user registration and email authentication using Core **Java (JSE)**, **JDBC**, and **Servlets**, with a front-end built in **HTML**, **CSS**, and **JavaScript**, featuring email verification, secure sign-in, and session management.

Typing Speed Test

Developed a **front-end typing speed test application** using **HTML**, **CSS**, and **JavaScript**, featuring an interactive interface that tracks user speed and accuracy in real time to enhance typing skills.
